SUMMARY

AI Engineer & Full-Stack Developer with 4+ years of experience delivering production-ready AI and cloud-native applications. Skilled in TypeScript, Node.js, .NET and cloud (AWS), with hands-on expertise in LangChain, OpenAI API, MCP protocols, RAG pipelines, and vector databases. Proven track record deploying generative AI systems into production, building reusable AI infrastructure, and integrating monitoring and testing strategies. Adept at bridging platform engineering with full-stack development to design secure, scalable, and intelligent systems.

Skills

- **Agentic AI:** LangChain, LangGraph, AutoGen, MCPs, RAG pipelines, Vector Databases
- **Full-stack development:** TypeScript, React, Angular, Vue.js, Next.js, Node.js, Nest.js, Java, Python
- **Cloud & DevOps:** AWS(EC2, S3, Amplify, Bedrock), Docker, Kubernetes, GitHub Actions,
- **Databases & APIs:** PostgreSQL, MongoDB, GraphQL, RESTful APIs, Redis
- **Testing & quality:** Jest, Karma, Selenium, CI/CD pipelines, TeamCity
- **Engineering Practices:** Platform engineering mindset, reusable AI infra, cost optimization in cloud, SOLID principles, clean-code, product-oriented development

PROFESSIONAL EXPERIENCE

Software Engineer | TOMTEC IMAGING SYSTEMS GMBH | www.tomtec.de

Unterschleißheim, Germany

March 2022 – Current

- Deployed **AI chatbot prototypes** using OpenAI API, Anthropic Claude, and LangChain, with **RAG pipelines** integrated into internal Confluence datasets for real-time knowledge retrieval.
- Built a custom **MCP server with LangChain and ChromaDB**, orchestrating **context ingestion, vector search, and query routing** aligned with emerging AI protocols.
- Designed and delivered **spec-driven approach** that leveraged LLMs to interpret system requirements and codebase context, enabling automated generation and updating of UI test scripts (Selenium + unit tests) —improving coverage, reducing manual effort, and **ensuring reliable monitoring of AI-enabled systems**.
- Refactored legacy monolithic applications into a modular Angular + Java (Gradle) architecture, **decoupling services and maintaining backward compatibility** while strengthening **CI/CD pipelines and test coverage (Karma+ Selenium)**
- Modernized reporting features by migrating from Wicket to React within Philips HSDP, **a hybrid cloud platform**. Contributed to **backend RESTful API design and implementation**, using *OpenAPI* for auto-generation to support scalable, maintainable integrations across cloud-based services.

Web Developer | Ningbo Turing Singularity Intelligent Technology Co., Ltd

Ningbo, China

July 2021 – March 2022

- Designed and developed **React + Node.js applications deployed on AWS ECS**, collaborating with designers to deliver responsive and user-friendly dashboards.
- Integrated **Ethereum smart contracts using Solidity**, enabling decentralized identity verification and secure data workflows.
- Established GitHub **Actions CI/CD pipelines** and delivered internal training sessions, improving release quality and consistency, while **organizing Scrum ceremonies** to enhance team collaboration and delivery efficiency.
- Balanced technical constraints with client goals, acted as the main point of contact with customers and external stakeholders to ensure product development **stayed aligned with requirements**, while gathering first-hand feedback from end users to guide features and **maintain a product-oriented approach**.

Front-end Developer | Ningbo Jetron Technology CO., Ltd | *en.nb-jetron.com*

Ningbo, China

Dec 2020 – June 2021

- Delivered enterprise frontend systems for MOM and MES solutions using Vue.js and ElementUI/Vant.
- Led UI and frontend integration for shipment and inventory tracking systems, resulting in measurable workflow improvements.
- Participated in API design reviews and contributed to frontend-backend alignment for data handling and validation.

EDUCATION

Masters of IT in Software Development

University of Technology Sydney, Sydney, Australia

March 2021

- Contributed to **WebSVF**, an open-source interactive code analysis tool.
- Developed a full-stack cat image forum using MEAN stack (MongoDB, Express.js, Angular, Node.js)
- Relevant Coursework: Advanced Internet Programming, Interactive Media, Enterprise Architecture Design, Interaction Design, iOS Application Development.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03)
- AWS Certified AI Practitioner (Foundational)
